

**Application example**

DN200 Gate valve

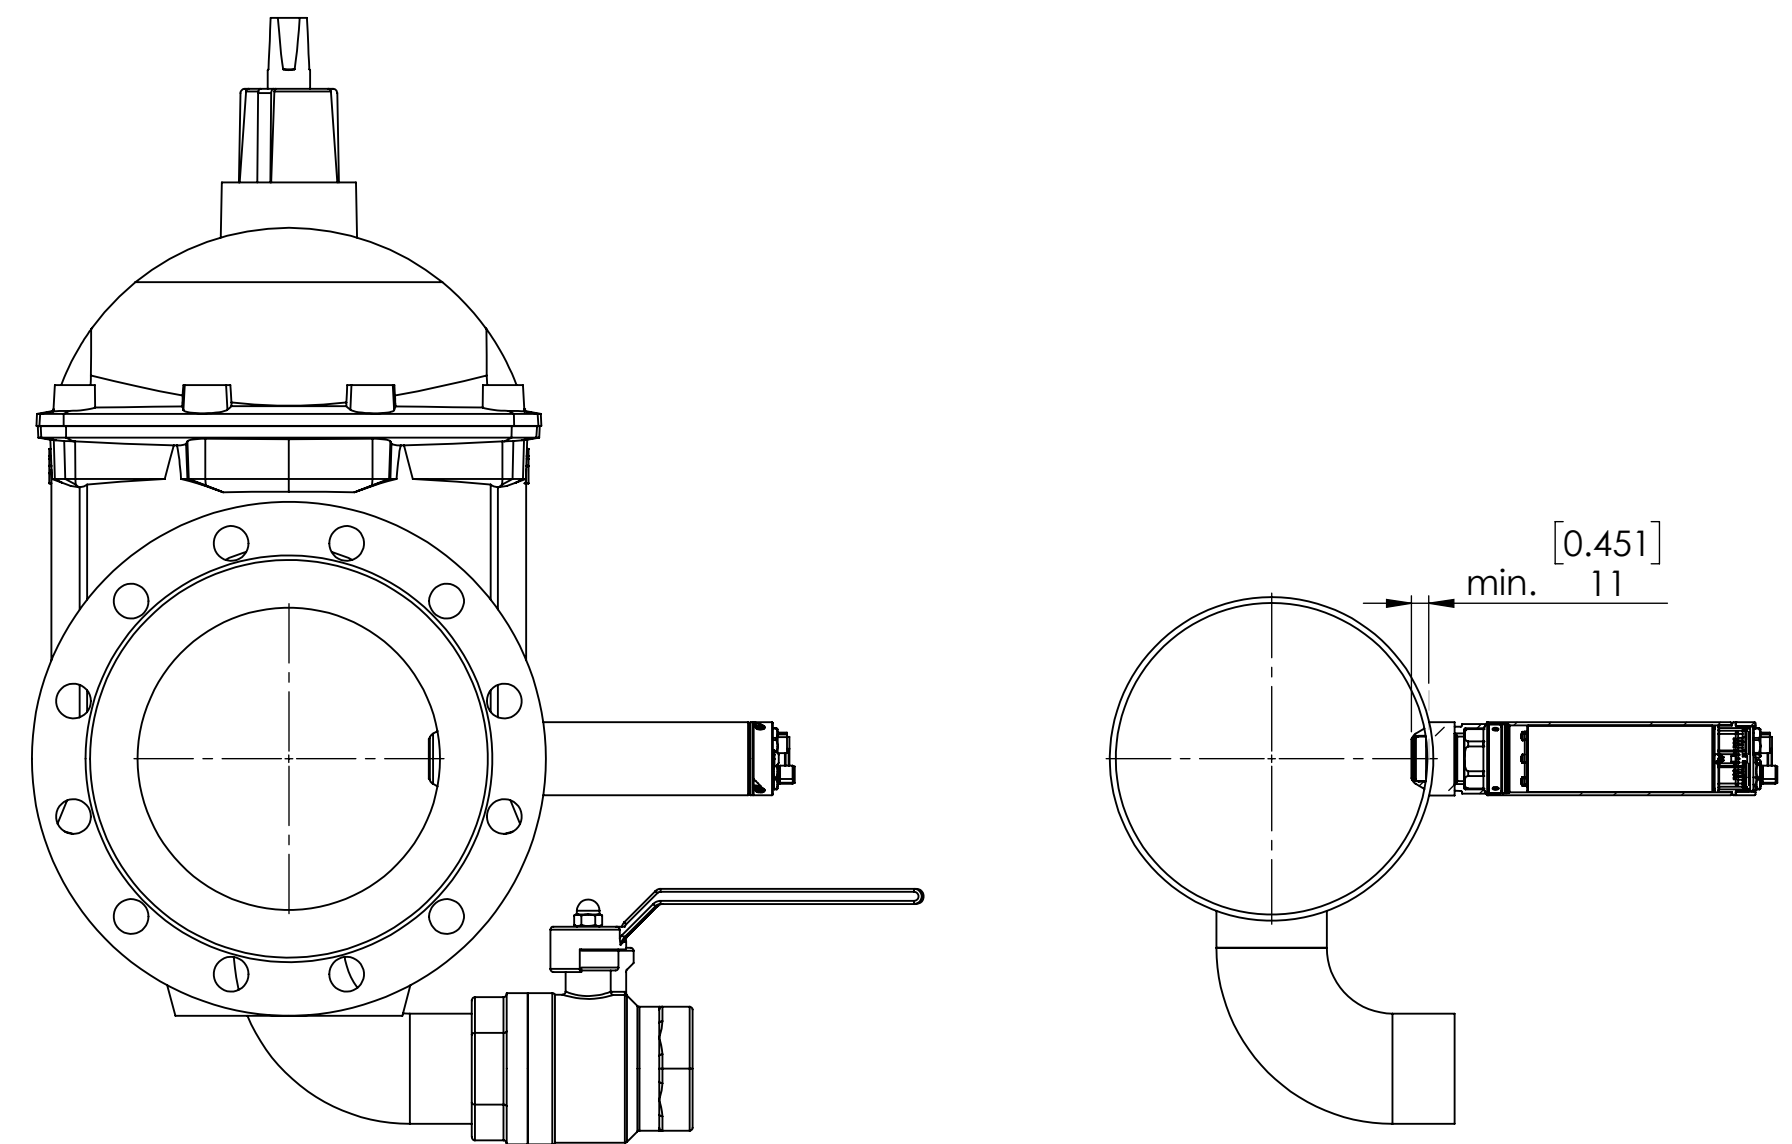

DN200 pressure pipe

B

B

Drain valve

This technical drawing illustrates a gate valve assembly with a drain valve. The main assembly consists of two gate valves connected by a horizontal DN200 pressure pipe. The gate valves are shown in a closed position. The drain valve is located at the bottom of the assembly, connected to the pressure pipe. The drawing includes labels for the 'DN200 Gate valve', 'DN200 pressure pipe', and 'Drain valve'. The pressure pipe is labeled with 'B' at both ends, indicating its connection to the main system. The gate valves are labeled with 'A' at their top connections. The drain valve is shown in a cross-sectional view, highlighting its internal structure and the connection to the pressure pipe.
